

AMETHYST PILLOW

is made with a new production technology that uses a 3D surface removal system.

Perfect balance between amethyst, tourmaline, and ochre!

3D surface removal production technology prevents the product from yellowing. The combination of ochre and negative ions works for antimicrobial action and the removal of bad odors. The pillow's ergonomic design reflects the best possible sleep science.

NATURAL INFRARED RAYS ARE THE SAFEST ENERGY SOURCE

Amethyst healing has been associated with an art and practice, done on a metaphysical level that has been rediscovered because of the power of the Earth's energies that have been absorbed by these sacred objects. In turn, they inherit vital healing powers.

Some believe that amethyst has physical, spiritual, calming and zodiacal powers that can be used to calm the mind, body and spirit.

Amethyst has come to be known as a power crystal associated with prolific healing powers that can be characterized as purifying, pacifying and transitional. Amethyst has the ability to transform lower energies into higher ones, and acts as a healer on all levels of mind, body and spirit. The healing powers of Amethyst date back as far as the ancient Greeks who believed that Amethyst protected a person from the intoxicating effects of alcohol. The word "Amethyst" is of Greek origin, and is translated as - "Amethystus" intoxicated ("-methystos" from "methylin" or intoxicated, "methy" = wine).

NATURAL INFRARED RAYS

Some other qualities it is believed to have are:

- ▶ To calm emotions and reduce stress
- ▶ To increase physical energy
- ▶ To increase stamina

TOURMALINE

Tourmalines are abundant, complex boron and aluminum silicate minerals of variable composition. Tourmaline comes in a wide range of colors, depending on its mineral composition, with black being the most common. Concentric color zoning often occurs as well. The colored varieties, when transparent and flawless, are cut as gems. In addition to its use as a gem, tourmaline is employed in pressure devices because of its piezoelectric properties.

Chemistry	Crystal System	Hardness
SiO ₂ + B, Al	Hexagonal	7.0-7.5
Cleavage	Fracture	Specific Gravity
None	Variable	3.0-3.2

Tourmaline forms slender 3, 6, or 9-sided prismatic crystals (hexagonal system) in parallel or radiation groups, which causes it to develop an electrical charge when heated or deformed. Pieces cut perpendicular to the long axis can polarize light, and a pair of these plates form a very simple polarizing apparatus known as tourmaline tongs.

AMETHYST PILLOW

BEST QUALITY AMETHYST

The Safest Energy Source!

This Wonderful Feeling is a Dream Come True!

Amethyst is believed to detoxify the body and be a good source for far infrared rays. These rays will leave you feeling revitalized.

GOOD SLEEP

Amethyst, as a healing stone, is believed to have sobering and calming qualities. This stone is commonly associated with peace. It has been deemed "nature's tranquilizer" by many healers because of its effectiveness in relaxing the mind. Besides being a stone of tranquility and repose, Amethyst is believed to enhance mental strength, stability, and vigor.

Elastic Polyurethane Memory Foam Pillow Originally developed for NASA, this space age memory foam conforms to your head and neck to ensure an anatomically supportive sleep posture.

It also features a therapeutic shape to provide additional support for your neck while comfortably cradling your head and includes a luxurious zippered cover.

ANTIMICROBIAL TEST

✓ Antimicrobial effect

Ochre contains a range of antibiotic and antimicrobial enzymes, including catalase, diphenol oxydase, saccharase, and protease, that eliminate 99.9% of germs and bacteria, such as Staphylococcus, which causes pneumonia.

▶ TESTING RESULT

- Test Method: KFIA-FI-1002
- Name of used bacteria
 - Escherichia coli ATCC 25922
 - Staphylococcus aureus ATCC 6538
- Reduction Rate Of Bacteria (%): 99.9%

Escherichia coli ATCC 25922

After 24 hours

Staphylococcus aureus ATCC 6538

After 24 hours

FAR INFRARED RAY TEST

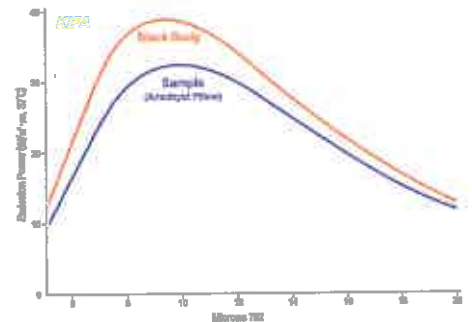

✓ Clay Cushion

Ochre has the function of far infrared radiation. An ochre cushion includes no harmful chemical substances.

▶ TESTING RESULT

Emissivity (5~20um)	Emissivity Power (W/m ² at 37°C)
0.894	3.45 x 10 ²

- Test Method: KFIA-FI-1005
- The temperature of 37°C is provided by the applicant. The above experimental results were measured in comparison with BLACK BODY by using the FT-IR Spectrometer.
