

## Introducing EnVie Lymphatic & Cellular Detox with Tracy Fleisner

### **The Lymph is your body's filtering system.**

Working properly it helps to keep the organs clean by removing impurities and fighting infections. The Lymphatic System is a major part of the Immune system. Without it we would not be able to survive. Take care of your lymph system and the lymph system will take care of you.

### **The Benefits**

As we surround ourselves with toxic elements in our air, food, and water, proteins clump together and bond electrically with water; thus our lymphatic system becomes unbalanced and overburdened. This results in pain and inflammation that contribute to various chronic degenerative diseases. As an adjunct method for promoting and maintaining wellness, the ST-8 assists in restoring the cells' natural energy level, creating healthy cell-to-cell communication to move clumped cells that otherwise burden the lymphatic system and contribute to various chronic issues.

### **The ST-8:**

- Uses specific frequencies known to influence the energetic pattern of virus, fungus, and bacteria are to inhibit their development in cells that are stagnant
- Helps with the removal from the interstitial space of unnatural additives in our food, including steroids that mimic hormones and attach to proteins
- Aids in proper lymphatic drainage — rapid movement of waste material within the cells can occur, which greatly increases the delivery of waste material to the organs responsible for body waste disposal
- Helps bring stagnant lymph pathways to life, building an immunological barrier to disease
- Uses SpectraSweep technology, complementing the electromagnetic field to bring the body into a tranquil state, which can be felt even during the first use
- Introduces super-saturated oxygen into tissues and organs, enabling remarkable healing potential

Lymphatic detoxification enhances the body's healing process by re-establishing lymphatic circulation throughout the body. The ST-8 assists the lymphatic system in functioning properly, creating a less toxic milieu and helping to resolve many issues associated with the lack of long-term health and beauty.

### **How the ST-8 Works**

The ST-8 is an innovative breakthrough developed from LBG technology. In addition to two specially developed ST-8 heads, the ST-8 uses two LBG heads in which electric signals excite a proprietary blend of noble gases to generate a photon. Then, in both the LBG and ST-8 heads, a scalar moment is generated. The ST-8 has the capability to transform pure oxygen into energetic super-saturated oxygen. The fusion of coupled photons and scalar energy deliver energy and energetic super-saturated oxygen into the body's cells, allowing for maximum penetration of tissues and organs.

**Here are some symptoms to look for** that may benefit from ST8 sessions: Signs of lymph congestion, including: headaches, sluggishness, lethargy, inflammation, digestive discomfort, lymphedema, swollen lymph nodes, cellulite, cancer, arthritis, lupus, migraines, chronic illness, fibromyalgia, Lyme's disease, detoxification, prostate enlargement, pre and post-surgical care, weight loss, scar tissue, acne and other skin disorders.

Now offered at:

**Francis Chiropractic**  
1005 Eastern Ave  
Plymouth, WI 53073

**Fox Valley Wellness Center**  
180 Knights Way, Suite 200  
Fond du Lac, WI 54935

## ST 8 Lymphatic:

### What is it?

Light Beam Generator ST-8 is a multi-head unit that assists the body in restoring proper lymph function. The ST-8 is the world's first oxygen-fed tissue detoxification system that uses energy to transform pure oxygen into super-saturated oxygen. The system delivers energy to the body's cells, actively re-establishing the body's natural energy process. It uses six different lights, gas and electromagnetic pulsing therapies; the ST-8 delivers gentle incoherent photonic light deep into the cells and lymph nodes, breaking up protein structures that block the lymph system from doing its very important job...eliminate waste. The system is non-invasive and non-cytotoxic (non-toxic to cells). It significantly reduces the potential for a healing crisis because of its precise delivery of the oxygen-saturated molecule to the site of lymph stasis. Scalar technology combined with super-oxygenated oxygen allows for remarkable healing potential, bringing the body's blueprint to life.

Lymphatic detoxification enhances the body's healing process by re-establishing lymphatic circulation throughout the body. The ST-8 assists the lymphatic system in functioning properly, creating a less toxic milieu and helping to resolve many issues associated with the lack of long-term health and beauty.

As an adjunct method for promoting and maintaining wellness, the ST-8 assists in restoring the cells' natural energy level, creating healthy cell-to-cell communication to move clumped cells that otherwise burden the lymphatic system and contribute to various chronic issues.

### How Many treatments?

The number of sessions needed depend entirely upon the condition, severity, or goals with the appointment. Each session may range from twenty minutes to two hours or longer, depending on each case. Children, infant to eight years old, may be on the lymphatic unit for ten to fifteen minutes. Typically a younger body has less to eliminate and their bodies tend to be more readily to let go of waste. A child usually voices "done", when they have had enough.

For a preventive approach, appointments received once a month may be appropriate.

After evaluation we will discuss with you a path that is best for your situation.

**Here are some symptoms to look for that may benefit from ST8 sessions:**

Signs of lymph congestion, including: headaches, sluggishness, lethargy, inflammation, digestive discomfort, lymphedema, swollen lymph nodes, cellulite, cancer, arthritis, lupus, migraines, chronic illness, fibromyalgia, Lyme's disease, detoxification, prostate enlargement, pre and post-surgical care, weight loss, scar tissue, acne and other skin disorders.

#### **St-8 Lymphatic Decongestion with Oxygenation**

The ST-8 lymphatic unit utilizes photonic light, frequencies, oxygen, ozone, and colored lenses that optimize cellular decongestion and relieve of inflammation in tissue. Effective for clients dealing with lymph-edema, discomfort, cancer, immune disorders, digestive concerns, and anxiety; as a few examples.

### What is ST8?

The ST8 is the worlds first Oxygen-fed Scalar Transmitter Tissue Detoxification System. Non-invasive and non-cytotoxic, the ST8 helps detoxify tissue by assisting the body in dissolving lymph blockages and restoring normal lymph flow using novel quantum scalar technology coupled with super-oxygenated oxygen for remarkable healing potential.

The ST8 technology represents a \*quantum leap\* in expediting critical lymph stasis. It significantly reduces the potential for healing crisis by placing the super-oxygenated oxygen molecule directly at the lymph stasis target site without the risk of creating damaging free radicals in the body. The ST8 is an effective technology for overcoming critical-care lymph stasis... and it avoids the pitfalls of high voltage gas-ionization, as high as voltage gas-ionizing units produce non-penetrating, surface ionization that may contribute to cytotoxicity at certain output levels requiring EPA monitoring.

#### **THE PROBLEM:**

According to Dr. Rirna Laibow, M.D, protein structure in living, healthy tissue is always in a state of alignment. This is most evident in the tissue that holds the body together where the alignment of collagen fibers is stable. However, protein structures break down as cells die or are damaged. These waste proteins are easily removed by a healthy, functioning lymph system. But when the lymph system has become congested or even clogged and it can no longer efficiently flush these wastes, these useless proteins become trapped in the interstitium (the area between the living cells in connective tissue).

These non-functional proteins have the same electrical properties of attraction as functioning proteins, though as they organize, their structures are completely random and characterized by instability. This is called fibrotic condition of the interstitium. The instability of these non-functional proteins causes them to attract water and hold it via electrical bonding, resulting in swelling and further congestion. And this is edema, now, with a clogged lymphatic system continuing to fill with waste proteins and other toxins and as organs lose their ability to remove waste through the lymph system, all kinds of pathologies can occur in the body.

#### **THE SOLUTION!**

Using extremely low current, cold-gaslight photons, the ST8 a beneficial photon-field environment around the cell in which the cell can correct its electromagnetic charge. No longer characterized by instability as the cell's field is now balanced, these non-functioning proteins separate from their pooling, random structures and release the collection of water they were holding, restoring natural lymph fluidity and greatly enhancing the delivery of waste material to the organs and nodes responsible for waste elimination.

Healthy tissue protein structures do not attract water as they are already in balance; and because they are already in balance, they ignore the energy the STS presents. With these random protein structures broken up and released from their bonds to water, a lymph therapist can now work with more pliable tissue. The tissue has returned to a state of free-flow, the ideal condition for effectively swollen tissue.

#### **THE ENERGETICS LEVEL:**

The ST8, because it is working with the quantum scalar, takes the super-oxygenated oxygen's "energy signature" and delivers that energetic signature directly to the targeted area... directly to the affected cells, which will choose whether to accept or reject the ST8 incoming frequencies. Cells are selective and will naturally choose only the vibratory rate required to put themselves back into balance.

And since the super-oxygenated oxygen is transmitted to the cell at the quantum energetic level through the field rather than through the body at a material level, side effects are non-existent. Like a homeopathic remedy, which also uses the energetic signature of a material rather than the material itself (though unlike a homeopath, the ST8 applies that energy directly to the affected site), there is a cause and effect benefit without the introduction of physical material available to help create them... only an energetics signature of the physical material is present.

## **OXYGENATED TISSUE:**

The ST8 was created using the Max Planck Institute's (Germany) premise of injecting ozone into tumors of critical care patients. When ozone was injected, the tumor turned to mush. The disease was devitalized, as it could live in an oxygenated environment. Using this principal, researchers took the idea of injecting ozone into the body and combined it with quantum scalar technology, thus energetically carrying the oxygen's information to the field and the body and present it at the cellular level. With the ST8, the energetic signature of the super-oxygenated oxygen is introduced at an energetic level so cells have the opportunity to return to a normal, healthy state... armed with the right energetic information to bolster the immune system.

When coupling good medicine and super-oxygenated oxygen to support tissue detoxification, the body has a grand opportunity to recover from - and prevent - many serious illnesses. Applied evidence supports the fact that extreme metabolic stagnation commences to disassociate upon presentation of energy produced by the ST8 with no adverse side effects.

Dr. Dean Silver, in summer 2001, discovered he was suffering from T-Cell Lymphoma and "loaded with toxins and lead and mercury and insecticides". In summer 2002, after foregoing chemotherapy and biopsies in favor of a program "religiously" using the ST8 in conjunction with dietary changes, immune enhancers, enzymes, etc, Dr. Silver had "no more lymphoma signals". "My energy level picked up; I got the lead out.. Immune function was sky high; killer cell function was sky high; felt pretty good... I'm clean now". At the Sixth Annual International Conference of Bio-Energetic Medicine, Dr. Silver called the ST8 groundbreaking science" and said, "the way I see this is, I don't think antioxidants did this. I don't think [my other medications, the enzymes, etc] did it. I really think this medicine did it... I really think this the way to get toxins out of people... and I think a lot of us are missing the boat... How do my lymph nodes clear up in a year? I think it [the machine] really works".
